

### **Water-Based Cosmetics Gets Rating**

Updated Dec 13, 2007 at 0:34 EST.

*Sophyto's* new line of products to be available as of January 2008 will be the first professional water-based [cosmetics](#) to gain the Soil Association organic rating. The rating verifies that the cosmetics were made without the use of pesticides or other chemicals that may be harmful.

The UK-made range will include moisturizers, [cleansers](#) and facial masks. Prospective consumers will also be able to obtain a sampler kit so that they can test the different products in the line. The vegan and environmentally-friendly products will be fully biodegradable.

The [skincare](#) products will be available on the Sophyto website, QVC shopping channel as well as spas and other outlets.
